RUN SYSTEM
Because Every Business is Unique

Company Name

PT Indotama Omicron Kahar

Industry Sector

Manufacture

Implemented Modul

- Financial and Cost Control
- Procurement
- Raw Material Procurement
- Inventory & Material Management
- Production Management
- Sales and Distribution
- Plant Maintenance
- Quality System
- Human Resources

Before

The **large** amount of **cashflow** and **transactions** turnover in a day makes the company quite **difficult** to **calculate** and **record** their payments either their purchases.

The **variety of employee and labor costs,** will it be daily or monthly**,** has made the company face the difficulty and **complexity of calculating salary**.

After

With **RUN System Procurement and FICO Module**, it helps the company to record and validate transaction precisely, so the information and financial statement will be **real time.**
In addition, the company also gain **1 – 2 % of tax efficiency** due to the accuracy of transaction calculation by system.

With **RUN System Human Resource Management, Production and FICO Module**, it helps the company to calculate employee's payroll more precise by using **Shop Floor Control** menu to ensure the suitability of labor's work and what they will receive in pay slip.

Use case example

PT. TAMAN WISATA CANDI

Company Name

PT Taman Wisata Candi (persero)

Industry Sector

Services - Tourism

Implemented Modul

- Financial and Cost Control
- Procurement
- Inventory & Material Management
- Human Resources

source:borobudurpark.com

Before

Decentralized Cashflow, will caused possible loss of income in cash.

Lead time in revenue recognition and record.

After

With **RUN System FICO Module**, cashflow turnover will be **centralized** and recorded automatically by the digitalization and integration of system, so it makes the **financial report** of the company more precise and **realtime**.

Use case example

Company Name

PT Kawasan Industri Medan (persero)

Industry Sector

Services – Industrial Park

Implemented Modul

- Financial and Cost Control
- Procurement
- Inventory & Material Management
- Sales and Distribution
- Human Resources

source: kim.co.id

Before

Long sales contract (up to 20 years ago) causing **uncontrolled transaction records.**

Add **new business** units that **differ** from their **core business.**

After

With **RUN System Sales Distribution Module**, it helps the company to organize their transactions record and manage to find uncollectible account receivables by using **DO to Customer.**

No need customization because our system has its own **special menu** to adjust and add new item for their new business units by using **Master Item**.
